Fellows:

Thanks for your very thoughtful Christmas present of a years extension of my ARRL membership. I am sure you all understand how much I value the ARRL and its work, which is why I have subscribed to every issue of QST since 1916 and been a continuous active member of the League since 1919.

I have had time lately to recall those good old days when life revolved around the MRAC for those of us who were hams at the time, beginning for me in December 1919 when I laid up WNY for the winter for the old Marconi Wireless Telegraph Company of America, and decided to come to Milwaukee to live.

Its kinda tough on me that this had to happen during a sun spot peak, when I had planned to duplicate on 50 mc the fun I had on 28 mc during the preceding sun spot maximum. However, I am learning to be patient, and they are not fattening me up just for the fox farm, so guess I'll have to wait until the next sun spot peak in 1958 for W9NY to go after some more records. In the meantime, my very best wishes for all of you.

Herbert F. Waring.
